L-865(L) LED / I R

White Day/White Night System

WHERE ENGINEERING
MEETS PASSION.™

The **ILS-2600 Medium Intensity White Obstruction Lighting System** utilizes LED technology and precision optics to provide a low power, low light pollution, tower lighting solution. **All electronics is accessible at ground level** reducing the need for costly tower climbs. The flash head contains only LEDs and a multi-stage surge suppression network. System modularity facilitates maintenance and long term reliability. Low noise design enhances **compatibility with 4G/LTE technology**.

Features

- Precision optical design minimizes both “sky-glow” and “ground-scatter” light pollution.
- **Infrared** operation included.
- **Multi-stage surge suppression** networks included in the flash head and at ground level.
- Rated for up to **800 ft** of flash head cable.
- No microprocessor or driver electronics above ground level.
- **GPS** synchronization of flash requires only the addition of a GPS antenna (ANT-018X-GPS-KIT).
- Dry contacts (Form-C) provided for White Alarm, Red Alarm, Infrared Alarm, Side Light, Photocell, GPS and Power Fail alarms and day/night mode.
- Failure of the photocell to transition results in default to day mode operation.
- Indicator LEDs provided for white alarms, PEC alarm, side light alarm, operating mode, GPS functions and more.
- D2 type systems available.
